Community Agreement of Respect

Rules of Respect

1. Ensure all voices are heard
2. Actively listen and respect differences in opinions
3. Use “I” statements
4. Lean into discomfort
5. Address the issue, not the person
6. Be honest and embrace honesty
7. Don't disclose others' information without their knowledge and consent

Community Agreement of Respect

Understanding the problem

By 2040, Black and Latinx communities will make up almost 40% of the United States population, and yet these populations face disproportionate racial and economic inequities, limiting social, economic, and cultural growth.

Racism is a major public health issue.

For example, one black person prematurely dies every 7 minutes due to racial discrimination.

Source: Robert Wood Johnson Foundation

Creative Reaction Lab is educating and deploying youth leadership to address racial inequities impacting Black and Latinx populations.

Priority Areas:

- Education
- Health/Healthcare
- Government/Public Service
- Media

Our Goal?

**Create the racial
equity and justice
leaders of tomorrow**

Language Setting is
the first step in any
community-centered
work.

Diversity  **Inclusion**
is invitation *is acceptance*

Equality  **Equity**
is sameness *is fairness*

Term for the Day: Equity

(And, what's next?)

Equity revolves around systemic and network outcomes.

Equity is when outcomes are not predictable based on someone's identities.

**Ultimately, we
want liberation.**

Modified from Forward Through Ferguson's definition of racial equity

**Why does diversity,
inclusion, equality,
and equity matter?**

Society is changing.

- By 2050, 53% of the United States will be made up of people of color.
- Approximately 40% of the US population is of Black or Latinx descent.
- 85% of United States population growth will come from groups of color between now and 2050.
(*Source: U.S. Department of Commerce*)

Society is changing.

- By 2020, 59% of the workforce will be Millennials and Gen Z.
- In 2010, 19% of the US population reported that they had a physical and/or intellectual disability
(*2010 U.S. Census*)

Diversity leads to innovation.

Having diverse perspectives, skill sets, backgrounds, and lived experiences is crucial for developing new and innovative ideas.

(Forbes)

**And, this is where
most institutions
stop...**

**How do we
move from
awareness
to action?**

Design

**Design is not about
making things look good,
but making things work.**

Ruzanna Rozman

Product Designer & ALGA Cincinnati Operations Director

What is design?

The intention (and unintentional impact) behind an outcome.

Modified from IBM's definition of design

We need a new form of leader to address the exclusion and human inequities in our communities:

Equity Designers

What does public transportation mean to you in your community?

Okay...Great!

What's an Equity Designer?

An Equity Designer is...

An individual who **puts equity and people first.**

An Equity Designer is...

An individual who **embedded within a community** who strives towards the improvement of that community.

An Equity Designer is...

An individual who **builds upon existing resources** within their communities to create change.

An Equity Designer is...

An individual who works through the lens of failure, always making, testing, and **improving interventions.**

An Equity Designer is...

An individual with **lived experiences** related to issues stemming from human inequities.

Allyship is key
to supporting and
amplifying
Equity Designers.

**Your faculty, staff,
and students should
consist of both.**

The Case for Equity in the Education Sector

33% / 23%

Only 33% of African American and 23% of Latinx adults have at least a two-year college degree.

Source: Hechinger Report (2016)

65%

The widely accepted prediction is that 65% of jobs by 2020 will require education beyond high school.

**Any system produces
what it was designed
to produce.**

Modified from Forward Through Ferguson's definition of racial equity

Design for Exclusion

In 1779, Thomas Jefferson proposed a two-track educational system, with different tracks for the **“laboring and the learned.”**

Design for Exclusion

Scholarships would allow a select few from the laboring class to advance by **“raking a few geniuses from the rubbish.”**

Design for Exclusion

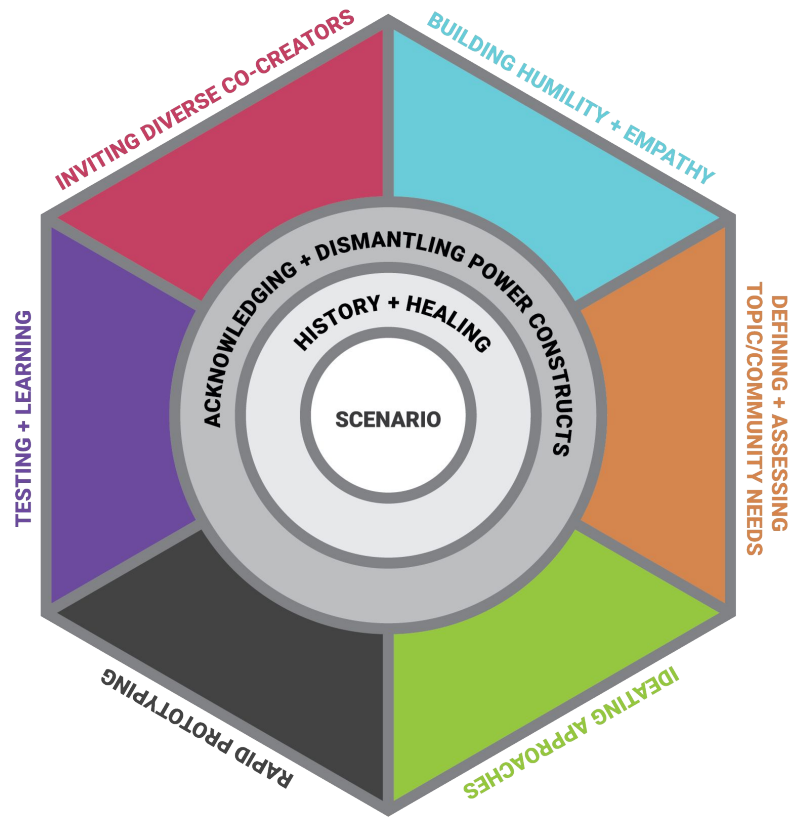

What are some other examples of design for exclusion?

small group activity + share out

**We have to consider
the sources and
impacts of exclusion
and inequities.**

If oppression,
inequalities, and
inequities are designed,
they can be redesigned.

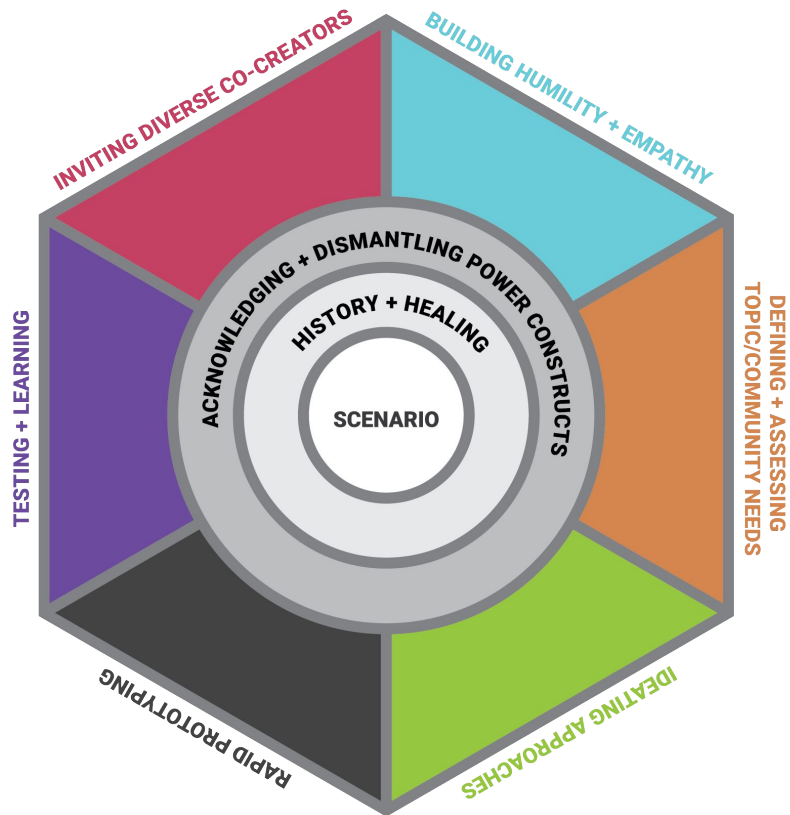

**Human-Centered
approaches are
not enough.**

Application to Your Work

You are a designer – every decision you make are designing outcomes and impacting others

Application to Your Work

You are working
alongside communities
that might be different
from you

Application to Your Work

You hope to develop approaches to address challenges that have built-in social complexity

Application to Your Work

You hope to align
your impact with
your intentions

**Education's power
is more than
job placement.**

**First, it starts
with you.**

Developing Our Perspectives

Developing **Your** Perspectives

Education

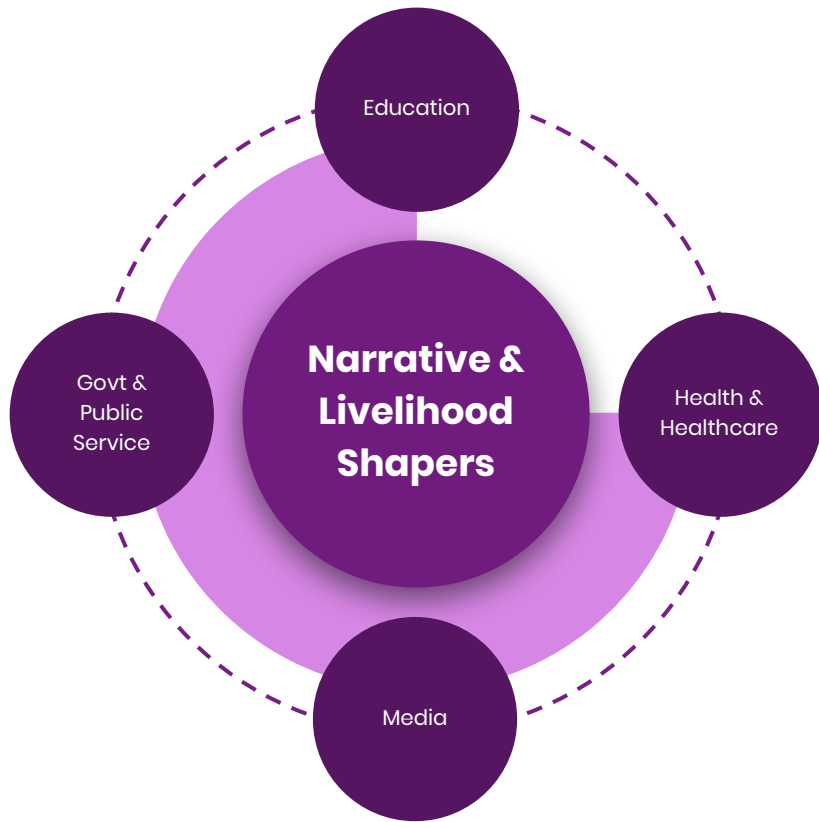

Media

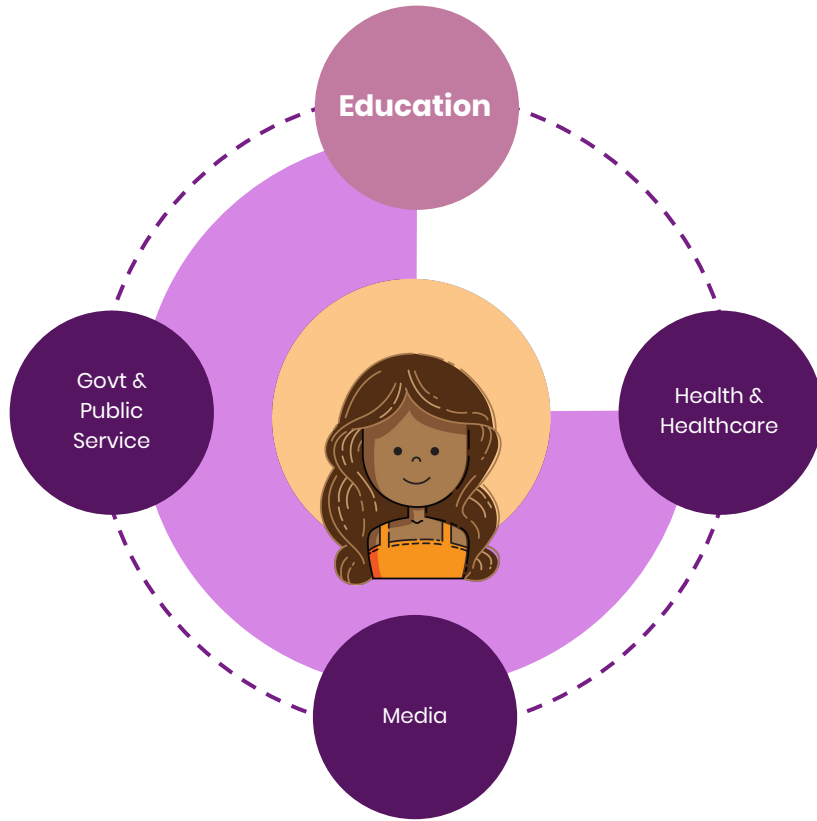

Environment

**Family,
Friends &
Culture**

**Understand your
power to design
perspectives
and outcomes.**

**You're a narrative
and livelihood shaper.**

Education is a
**narrative and
livelihood
shaper.**

**The team – the
designers – matter
as well.**
