Mohawk Valley Community College  
Utica and Rome, NY

Syllabus for Operational Amplifiers ET262  
Instructor: Jim Fiore, Professor  
Semester: Fall 2019  
Email: jfiore@mvcc.edu  
Phone: 792-5589  
Office: AB260B

Catalog Description: This course includes further study of linear transistor circuits. Examination of frequency response and negative feedback are of prime importance. Operational amplifiers are discussed in great depth, including applications in summing, precision rectifying, voltage regulation, filtering, and other popular circuit applications. Usage of digital computers for analysis and design is discussed.

Prerequisites: ET161 Linear Electronics.

Student Learning Outcomes: () – References ABET Program Outcome

- The student will demonstrate knowledge of analog electrical devices, particularly operational amplifiers and their applications. (a),(b),(e)
- The student will be able to utilize items such as decibels, Bode plots, and negative feedback for circuit analysis. (a)
- The student will use a mathematical and problem solving approach for design and analysis, based on fundamental DC and AC circuit principles and math concepts. This will include the use of computer simulations. (e)
- The student will demonstrate facility at constructing and troubleshooting op amp circuits in the laboratory with proper use of test equipment. (e),(i)
- The student will demonstrate appropriate communication skills, particularly technical reports through the laboratory. (f)
- The student will demonstrate the ability to work as part of a technical team, particularly in the laboratory. (d),(i)

Office Hours: MTWRF 1:25-2:20

Communication Policy: Generally, email is the most efficient means of getting a hold of me but always feel free to stop by my office. Make sure to check my home page and the course page first (see below).

Class Cancellation: A list of class cancellations can be found on the MVCC website: www.mvcc.edu

Web: My home page is: www.mvcc.edu/jfiore. Virtually everything you will need to know about this course including associated grading standards and requirements can be found on the course web page via my site (ET262 Op Amps link). This includes a complete week-by-week outline of chapter readings, homework, work sheets, lab assignments and approximate test dates. My current schedule is available on my home page along with utilities, manufacturer’s links, lab and class guidelines, and other useful items.

Grading Policy: The final grade is based upon an accumulation of points. There will be two or three one-hour, in-class tests worth 100 pts each. The final will be worth 300 pts, lab write-ups and work 200 pts, and approximately 100 pts for homework, quizzes and other projects. The instructor reserves the right to add or subtract up to 20 pts to (from) the total for class and lab participation, readiness, etc. This policy will be strictly adhered to in all but the most special cases. Lab work is an integral part of this course and thus students not attending lab and failing to hand in reports will automatically fail this course, regardless of test grades. Students not taking tests without a valid excuse will receive a grade of 0 on said tests. Make-ups are given at the discretion of the instructor. Tests may be curved up or down when appropriate. It is the student’s responsibility to notify the instructor of absence. It is strongly urged that students stop in before small problems become major ones. Any portion of my free time (not just office hours) is available for you. Further details on grading and class policy may be found at the link Class Policy on my main web page.

Labs: Proper safety procedures are a must and will be reviewed during the first lab. Make sure that you come prepared (books, calculator, etc.). You will not be allowed to work if you are not prepared, starting the second week! Unless otherwise specified, all labs require a write-up. These should be neat and legible. Standard technical writing style is expected along with proper grammar and spelling. On occasion, other methods of assessment may be required in lieu of the standard report.

Reports are due no later than one week following the date performed. The first half-week late creates a one letter grade loss, the second half-week causes a second letter grade loss. Reports are not acceptable beyond one week late. Detailed information regarding the format and grading standards will be given during the first lab and can be found at the link Common Lab Report Format on my main web page.
Technology Usage: In general, student use of technologies not relevant to this classroom setting is prohibited. This includes, but is not limited to, cell phones, MP3 players, and video/photo capture devices. Instructor discretion may be exercised if the technology is a component of the learning environment or by prior student notification. **Smart devices will not be allowed during tests.**

Academic Integrity and Civility: Unethical or dishonest behavior may result in failure of the course or other disciplinary actions. Further, professional and civil conduct is expected in both lecture and lab.

Students with Disabilities

I would appreciate hearing from anyone in the class who has any type of disability (e.g., physical, learning, mental health, vision, hearing, etc.) which may require some special accommodation. Please see me during my office hours so that we can discuss your needs. Before services can begin, you must also contact the Office of Accessibility Resources, 315-792-5644, in Room 129E of the Information Technology Building on the Utica Campus. Staff members will review your documentation, determine your eligibility for accommodations, and decide what those accommodations will be.

DGV Statement

A few years ago, MVCC initiated a program titled “Diversity-Global View” (DGV), which gave each of our graduates a chance to participate in educational experiences designed to increase awareness of intercultural perspectives. Our goal in doing so was to enhance our students’ understanding of the realities faced by individuals as a result of their race, ethnicity, cultural background, gender, sexual orientation, socioeconomic status, academic abilities and interests, age, religious beliefs, and physical ability. To that end, all graduates who matriculated into programs in the fall 2008 or more recently, or who have changed their major since 2008, are now required to complete the DGV components associated with the degree or certificate program in which they are enrolled. For more information please visit http://www.mvcc.edu/dgv.

Sustainability Statement

Mohawk Valley Community College is committed to development and implementation of a comprehensive sustainability plan. To that end, we are beginning by asking students, faculty, and staff to actively participate in energy conservation measures and proper recycling on campus. The green bins located in classrooms are for recycling only, not for trash. These are single source recycling containers and no sorting is required. Any materials that cannot be recycled should be placed in garbage cans. It is also important to turn off lights and computers when leaving a room. Together we can make an impact on conserving our resources. Remember to reduce, reuse and recycle!

Civility Statement

Mohawk Valley Community College is committed to civility in and out of the classroom. MVCC believes everyone has the right to an environment that creates the safe opportunity for educational, professional, and social development. MVCC recognizes its responsibility to model and encourage a culture of civil behavior.

Title IX Statement

Title IX states that no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving federal financial assistance. Protections also extend to sexual harassment and sexual assault or violence that impairs or interferes with access to equitable educational and employment opportunities. For more information, please visit the Title IX website at [www.mvcc.edu/title-ix](http://www.mvcc.edu/title-ix)
