

How to format your code: indenting is not *required* in C but is *expected*.

```
int func( int x )
{
    int a,b,c,d,e;

    for( a=0; a<10; a++ )
    {
        if( x>10 )
        {
            b=a;
            c=b*x;
            d=1;
            e=b*c*d;
        }
        else
        {
            b=a+1;

            if( x<0 )
            {
                c=b*x+1;
                d=c+x;
            }
            else
            {
                c=b*x-1;
                d=c-x;
            }
        }
        e=d*12;
    }
    return e;
}
```

How **not** to format your code: random (or no) indenting/spacing will make enemies.

```
int func( int x)
{
int a,b,c,d,e;

for(a=0; a<10;a++)
{
if( x> 10)
{
b=a;
c=b*x;
d=1;
e=b*c*d;
}
else
{
b=a+1;

if(x< 0 )
{
c=b*x+1;
d=c+x;
}
else
{
c=b*x-1;
d=c-x;
}
}
e=d*12;
}
return e;
}
```
